17.8 SEER2 / 8.8 HSPF2 UNIVERSAL SERIES DC INVERTER PACKAGED UNIT

MDPH1804**

The MRCOOL® Universal 17.8 SEER2 Inverter Packaged Heat Pump doesn't rely on fossil fuels to heat and cool. The DC Inverter is an energy-efficient heating and cooling ducted system conveniently packaged in one outdoor unit.

The variable-speed compressor allows room temperature to be continuously regulated and adjusted to meet the needs of the user. The compressor also conserves electricity while running quietly because the inverter technology doesn't require constant turning on and shutting off.
